| <p>F1 Powder Frits:</p> <ul style="list-style-type: none"> - Cobalt Blue - Marigold Yellow - Deep Purple <p>F2 Fine Frits:</p> <ul style="list-style-type: none"> - White - Yellow Opal - Hydrangea <p>F3 Medium Frits:</p> <ul style="list-style-type: none"> - Clear - Hydrangea |
|---|

Before you begin, treat your mold thoroughly with glass separator. [For a video on how we do that, please click here.](#) And remember to always wear a mask when using spray-on separator and/or powder frit.

Begin with F1 Marigold in the deep crevices and veins toward the center of the flower (**Image 1**). Sprinkle a bit of F2 Yellow Opal over the Marigold and into the petals (**Image 2**). Completely cover any yellow in the petals with F2 White, but leave the very center uncovered (**Image 3**).

Gently sprinkle or sift F1 Deep Purple around the outside rims of the petals (**Image 4**). Place F1 Cobalt Blue around the lines between each petal to add depth (**Image 5**). Fill the whole mold with a thin layer of F2 Hydrangea (**Image 6**) immediately followed by a thin layer of F3 Hydrangea (**Image 7**).

Back everything with F3 Clear to a sufficient depth, or, if using fill weights, until a total frit weight of 340 grams (**Image 8**). Sweep frit away from the edges of the mold and mound it towards the center to avoid burrs (**Image 9**). Fire to a Full Fuse using the suggested schedule in **Table 1** below or your own preferred Full Fuse with a bubble squeeze.

Seg	Rate	Temp °F	Hold
1	275	1215	30
2	50	1250	30
3	275	1330	10
4	350	1465	10
5	9999	950**	60
6	100	500	05

**If using COE90, adjust this to 900°F

*The most important part of a firing schedule is your kiln. For our suggestions on how to get to know your kiln to see if you need to adjust our suggested schedules, [click here!](#)

What exactly do we mean by "Frit Placement Tools"?

Frit, especially powder frit, can be difficult to place where you want it. So there are a few tools we like to use here for both frit placement and cleanup. Here are a few of them!

<p>Frit Placement Tools:</p> <ul style="list-style-type: none"> - Enamel Sifter - Line-And-Dot Sifter/Conical Sifter - Plastic Eyedropper (cut the bulb to create a scoop) 	<p>Frit Cleanup Tools:</p> <ul style="list-style-type: none"> - Quality Paintbrush - Earwax Vacuum
